Meet

Eura

The first AI Cyber Fraud Agent

Slash fraud operations time to seconds
with our **Generative AI**, fueled by Cleafy
Intelligence and unmatched visibility

Get to a new level of speed

Eura leverages real-time generative AI to answer your questions, analyze data, detect attack patterns, and provide instant responses to threats. At the speed of light.

Bridge the skill gap

Eura provides instant access to Cleafy's knowledge and expertise. Eura is a tireless collaborator for your analysts, handling complex tasks and enabling experts to focus on critical decisions.

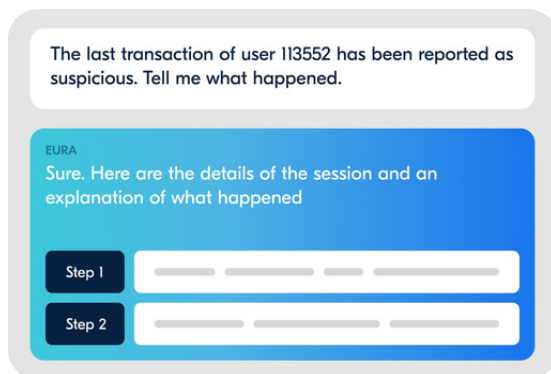

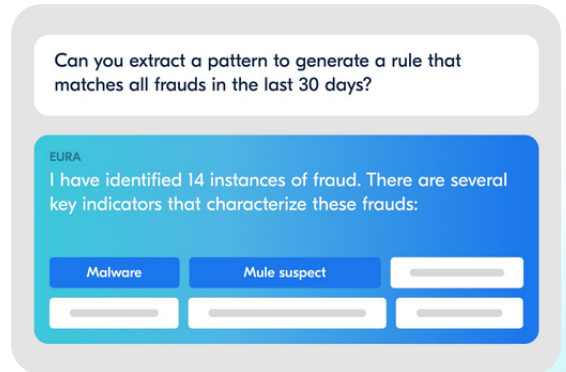

Fuse all knowledge into one

Eura facilitates synergistic collaboration, uniting the worlds of cybersecurity and fraud in a cohesive entity. Eura finally fuses data, knowledge, and languages to remove barriers towards the highest effectiveness and efficiency.

The future of fraud management is unfolding on Cleafy

Analyzing in a blink

Ask Eura for detailed session and transaction data and recommendations to reduce the noise and identify any anomalies in an instant.

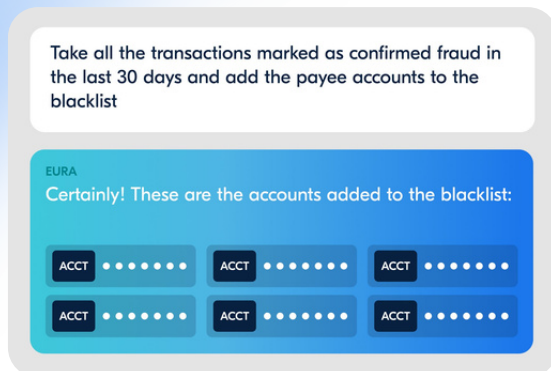

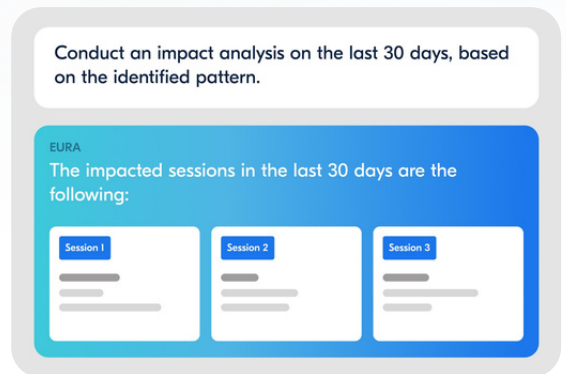

Connecting the dots

Eura acts as the enabler of instant pattern characterisation, significantly reducing the risk of cyber fraud through predictive analysis and constant monitoring.

Merging knowledge, expertise, and data

Eura seamlessly applies a vast stream of real-time monitored data from your channels, enhanced by Cleafy Threat Intelligence's actionable insights.

Automating complex tasks

Want to automate complex tasks? Just ask. Eura can search for risk indicators, set up rules, or customize reports.

Intelligence data

Eura draws from vast data and insights accumulated over years of hands-on experience in threat intelligence, fraud investigation, and pattern characterization.

Human-like interaction

With basic queries, Eura accelerates the analysts' workflow, from routine operations to intricate tasks like creating patterns or rules for automated responses.

Real-time data enrichment

Eura applies enrichment tags to information, elevating data quality and improving contextualization for in-depth analysis and informed decision-making.

Omni-language

It doesn't matter what your analyst's preferred language is, Eura can interact with any language in the most natural way.

The dawn of a new era

“Positioned as the herald of a new era in the fight against digital fraud in banking, Eura promises to redefine how financial institutions approach security.”

Matteo Bogana, Cleafy CEO

What would you ask Eura?

"Tell me how this incident happened step by step."

"Find all sessions from Android located in Italy."

"Find common data between User A's sessions and User B's."

EURA

Get a thorough exploration of data, facts, and incidents based on the searched data.

EURA

Conduct searches within the entire dataset of an instance.

EURA

Identify correlations between different sets of data.
